

SHAPE Edit™ Claims Scrubber/Editor

Secure Health And Privacy Environment

The Secure Services Corp. **SHAPE Edit** claim scrubber/editor is the most powerful scrubber on the market today. It will help you get paid on more than 98%+ of your claims the first time they are submitted.

Nationally, on average, only 65% of all first-claim-submissions get paid. Why is this? Studies have shown that up to 70% of all claim rejections by payers can be traced back to the time of patient check in. Combined with errors in coding, incorrect patient information, and other human errors, you're lucky to hit the average of 65%.

SHAPE Edit achieves a success rate in excess of 98%. How do we do this? By applying several techniques that other products don't have the ability to do.

WHAT SHAPE Edit does DIFFERENTLY

SHAPE Edit utilizes all seven SNIP/WEDI edit levels, while other programs use four or less.

SHAPE Edit is currently the only product utilizing all published, payer-specific rules.

SHAPE Edit is currently the only product utilizing unpublished rules based upon payer-specific behaviors. We proactively review payer web sites to seek out additional payer information, changes, additions, deletions and other payer behaviors.

SHAPE Edit is also the only product utilizing external code sets which include, but are not limited to: Modifiers, HCPCS & modifiers, Diagnosis Codes, Taxonomy Codes, Place of Service Codes, Revenue Codes, Payer ID Codes and Zip Codes

SHAPE Edit lets you edit the errors prior to payer submission

One of the most powerful features of **SHAPE Edit** is that you see exactly what caused an error, in plain English, at the bottom of the summary screen. This gives you the ability to fix the error **BEFORE** you send in the claim for payment. And since **SHAPE Edit** is so easy to learn and use, you no longer spend days training employees on a new program.

Errors are color coded for easy identification and editing

SHAPE Edit easily lets you see what needs to be fixed **BEFORE** you send in a claim with an error

SHAPE Edit provides you with:

- An easy to install, learn and use tool
- Payment on 98%+ of your first-claim-submissions
- Pay for only what you use with no installation costs
- No long-term contracts or financial commitments
- A tool that wraps around your existing Practice Management System, protecting and maximizing your investment
- A comprehensive claim scrubber which has tools that other products don't
- Expert, US-based customer and technical support

IT COULDN'T BE EASIER!

SHAPE Edit rules are updated weekly & automatically.

SHAPE Edit automatically and electronically submits your reviewed and scrubbed claims directly to the payer, expediting the claims process.

SHAPE Edit helps get you paid and lets you focus on what you do best - providing quality health care to your patients, rather than worrying about chasing claims and payments.
